

Do your best work, all in one suite

Google's G Suite uses Google's products and services to provide businesses with a more efficient workplace solution. G Suite's set of cloud-based collaboration and communications applications allow businesses to co-create, store, and share documents, spreadsheets, slideshows, and websites. It also works seamlessly with file types including Microsoft Office docs. With G Suite, new and small business will grow more quickly and run more cost-effectively.

KEY FEATURES

Office tools

G Suite's office tools enable you to create documents, spreadsheets, and presentations as well as create custom surveys and questionnaires, and team websites.

Communication apps

Efficiently communicate through a variety of apps, from audio and video calls to chat, email, social networking, and calendars.

Collaboration tools

Keep work in one place, and access and share files whenever you need them from any device. Edit files together in real time.

Secure data storage

Google Drive securely stores data across the globe in different data servers, keeping the data safe. Data are also encrypted in transit and at rest.

KEY BENEFITS**Flexibility and mobility**

Access data and communicate from anywhere, on any device with a web connection.

Increased productivity

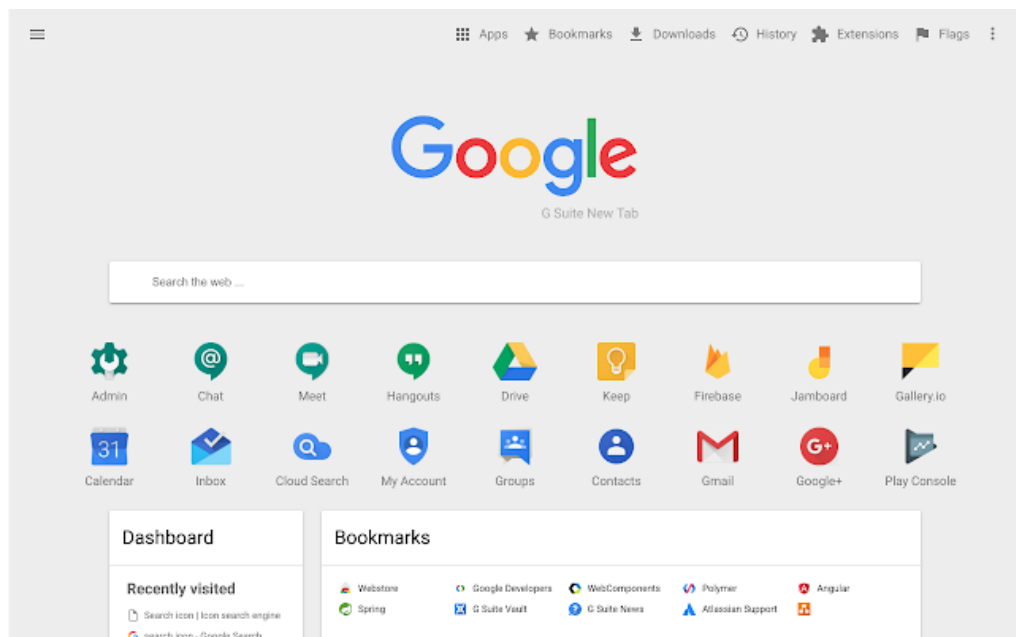

With 99.9% uptime and more real-time collaboration, you'll see fewer interruptions, less errors, and more productivity.

Easy to use

G Suite's products are intuitive and easy to use, and they can be used seamlessly with other file types, such as those from Microsoft Office.

Cost savings

The combination of fewer help-desk calls, faster resolution, fewer outages, less payout for external security, and eliminating expensive hardware and software upgrades and maintenance together lead to big cost savings.
